

Meeting Agenda

Group: Ipren

Date: 16/9/2019

Time: 17:00 - 18:30

Chair: Ömer

Participants: Johan, Ömer, Mohamad, Alex, David

Objectives

- *Resolve any issues preventing the team to continue.*
- *Short clear descriptions.*
 - We need to prepare for the seminar.
 - We need to discuss and rearrange (scale) the domain model.
 - We need to put association between the entities on the domain model.

Reports from previous meeting

- *Each group member reports outcome of assigned issues, see also 'outcomes and assignments'.*

Our domain model was not as abstract as it should be, also the association between the entities in our domains needed to be clear and discussed between the group members.

Ömer

- Contributes to rearrange (scale down) the domain model

Johan

- Contributes to rearrange (scale down) the domain model

Alex

- Contributes to rearrange (scale down) the domain model

Mohamad

- Contributes to rearrange (scale down) the domain model

David

- Takes the responsibility to draw and rearrange (scale down) the domain model

Discussion items

- *Discuss the identified issues, and possibly new or more general issues (very short notes and/or keywords).*

1. Should we add more or remove entities for our domain model? What are the association between the entities in our domain model?
2. How are we going to fix it?
 - a. Go through how we picture the app and try to look at how we can make it as abstract as possible.
 - b. Make it clear one how the relations is between our entities for our domain model.

Outcomes and assignments

- *Outcomes from discussion items. Write down what's decided and why it was decided. Sync with other documentation (add terms to wordbook).*
- *(re)Assign to each group member which issues to solve.*

We felt that what makes our app speciell is the ability to search, categorize, filter option, being able to add favourites and etc. Therefore we felt like movie, recommendation, user, watch later and watched should be our entities in this case. While not being 100 % sure if it's acceptable we see this as an open to discuss domain model with its associations between each other.

Wrap up

- *Write down any unresolved issues for next meeting.*
- *Decide a time and location for next meeting.*

- We'll have a second meeting tomorrow, 17/9 15:00.

Assignment for the next meeting, go through;

- Design pattern.
- UML diagram.
- RAD dokument.
- User stories. (pushed to Friday)
- Sequence map.
