# Meeting Agenda

Group: Ipren
Date: 11/9/2019
Time: 15:00 - 17:00
Chair: Johan Lindkvist
Participants: Johan, Ömer, Mohamad, Alex, (David is sick)

## Objectives

*- Resolve any issues preventing the team to continue.*
*- Short clear descriptions.*

- Discuss everyone's sketches
- Come up with a first draft for a final sketch
- Discuss everyone's user stories
- Come up with a first iteration of the domain model

## Reports from previous meeting

*- Each group member reports outcome of assigned issues, see also 'outcomes and assignments'.*

Ömer
- Suggested a menu that slides in from the side
- Suggested "cards" for displaying movies while browsing

Johan
- Suggested a menu on the bottom
- Suggested "cards" for displaying movies while browsing

Alex
- Suggested a menu on the bottom
- Suggested a grid for displaying movies while browsing

Mohamad
- Suggested a menu at the top
- Suggested a carousel for displaying movies while browsing

## Discussion items

*- Discuss the identified issues, and possibly new or more general issues (very short notes and/or keywords).*

We went through everyone's sketches and tried to come up with a "best of" design, merging ideas from all sketches. After that we went through everyone's user stories that we had written at home to compare. Last thing we did was to make up a domain model from these user stories and sketches.

## Outcomes and assignments

*- Outcomes from discussion items. Write down what's decided and why it was decided. Sync with other documentation (add terms to wordbook).*
*- (re)Assign to each group member which issues to solve.*

The main discussion was on what kind of menu system we wanted and what the different pages were going to be. We had two main ideas for the menu, a bottom one and a "slide in from the side" one. After some discussion we decided to go for the slide in as we suggested more menu items than that could fit on the bottom.

We also opted for a "card" style for the movies while browsing as then we can reuse much.

We decided to go for a search system consisting of a search bar on top that's always there and a filter system that you can slide in from the right similar to the main menu.

The different pages we decided on were "recommendations", "watched", "wanted", "settings", "movie page", "login".

A name for the app was discussed briefly, one suggestion was "What To Watch" but we decided to have this as plan b until we came up with a better one.

We decided to put everyone's user stories on GitHub and then we created the domain model last, which can be also been seen on GitHub.

## Wrap up

*- Write down any unresolved issues for next meeting.*
*- Decide a time and location for next meeting.*

We decided to wait for the topic of the next meeting until we had our meeting with our TA so we know we're on the right path. Suggested meeting time was on monday 16/9, but we're going to decide after the meeting with the TA.
